
Upcoming November, 2017 Classes

See the ACL website agecomputer.org for complete class description and future classes.

REGISTER ONLINE (Classes will be cancelled **48 hours** ahead if not enough enrollees.)

Digital Games

[Digital Hobby Games: Crossword Puzzles](#) (Monday, November 6 at 1:00 p.m. – \$25)

This class is part of a series of seminars for those who want to digitally make their own trivia games, crossword puzzle or jigsaw puzzles.

In this seminar, you will learn how to create your own crossword puzzles using a free program called Eclipse Crosswords. The Puzzles get 5-star reviews from ages 6 to 18, and even the parents got involved. You can select any theme, such as foodie, old music, movies, geography, or family vacations, and you can make a series of questions for the entire family to enjoy. The interface is simple, easy to understand, and fast.

Apple® Devices

[Apple: Review and Q&A](#) (Wednesday, November 8 at 10:00 a.m. – \$25)

During this seminar, we will review the Apps and topics that were covered in previous Apple seminars. We will also answer any new or old questions that students would like to discuss. Both new and previous students are invited.

Using Google Apps

[Connecting with Google](#) (Thursday, November 9 at 1:00 p.m. – \$25)

Google's online services are all about simplifying the way you manage day-to-day life. Whether using Gmail for fast access to email wherever you are, Calendar to plan your day, or Docs for rapid document creation, Google has you covered. In this class we will learn how to use Google's online apps, understand how they connect to each other, and learn how you can access them on the go. A question and answer period will be available at the end of the class as well.

Microsoft® Windows 10

[More Microsoft Windows 10](#) (Wednesday, November 15 at 10:00 a.m. – \$25)

This seminar will help you understand more of the new interface in Windows 10. We will cover topics that include features not found in previous versions of Windows, configuring Windows 10, enabling your personal requirements, and more. This is NOT a beginner's class in the basics of the computer. Topics covered in the class will be driven by student questions and interest.

[Windows 10 Creators Fall 2017 Update](#) (Wednesday, November 15 at 1:00 p.m. – \$25)

This is a hands-on class. It is designed for students who have been using Windows 10 for a while and have specific questions about the Creators Spring update released in April 2017 and want to know some of the changes that will happen in the Windows 10 Creator Fall update, which is scheduled to begin its release on October 17, 2017.

iPhone & iPad Apps

[Apps for iPhone and iPad: Sharing Ideas](#)  (Deal of the Month – Friday, November 17 at 10:00 a.m. – \$10)

There are all kinds of things you can do with your iPhone or iPad. I have a star gazer, a built-in translator, lots of fun games, an airport gate finder, a place to record the labels from bottles of wine I like and an app that helps me get to the trailhead in a national park. In this session, we will review favorite's apps in a variety of categories: travel, entertainment, games, health/fitness, food and outdoors. Let's share favorite apps and make our mobile life easier.

Note: Bring your iPhone and/or iPad charged and with a cord. Also, bring your Apple ID and password.
