
Upcoming February, 2018 Classes

See the ACL website agecomputer.org for complete class description and future classes.

[REGISTER ONLINE](#) (Classes will be cancelled **48 hours** ahead if not enough enrollees.)

iPhone Operating System

[iPhone® iOS 11](#) (Tuesday, February 13 at 1:00 p.m. – \$25)

Learn all about the changes and new features added to the latest update to the iPhone Operating System. We will discuss what fixes and improvements were made in the new iOS, whether you should or should not upgrade at this time, what may be a cost exposure to you, and more. **Note:** The student should have their iPhone power/USB cord to use in class.

Windows 10

[Windows 10 Introduction](#) (Wednesday, February 14 at 10:00 a.m. – \$25)

This seminar will help you understand the new interface in Windows 10. We will cover topics that range from the initial Windows 10 upgrade or setup to the features not found in previous versions of Windows. Our lab systems now have Windows 10 installed. This class includes both lecture and hands-on time. Questions about Windows 10 are encouraged.

Apple® Devices

[Apple: Pages and Numbers](#) (Thursday, February 15 at 10:00 a.m. – \$25)

Learn the features of Pages and Numbers, an alternative to Microsoft's Word and Excel. Most of the features are basic, but enough to create a document and spreadsheet. Bring your Apple Laptops, or watch the demonstration if you have an iMac at home. If you don't have access to Microsoft Word, Excel on your Apple device then this is the class to learn Apple's Pages and Numbers. **Note:** Know your Apple and iCloud account and password.

Photography

[Travel Photography including Night Photos](#) (Tuesday, February 20 at 1:00 p.m. – \$25)

Beyond being able to share your experiences with friends and family, travel photography gives you the ability to record your unique view of the world. Learn to shoot what you really see, what draws your attention. Maybe it's people, or food, or signs, architecture, gardens, water or crowds. And many of the places you travel come alive at night, so we'll also discuss how to get the best shots at night. Travel is a personal experience and your photography should reflect your personality and your taste.

Brain Games

[Fun Brain Games](#)  (Deal of the Month - Wednesday, February 21 at 1:00 p.m. – \$10)

If you have games you routinely play, this course will give you some ideas about new games that you might enjoy. We'll cover games that can be played on a variety of devices and games that focus on different "brain" functions.

Computer Maintenance

[PC Maintenance and Troubleshooting](#) (Tuesday, February 27 at 1:00 p.m. – \$25)

A computer, like any technical piece of equipment requires regular maintenance and repairs to keep it running in peak performance and with security. For a computer, this means performing regular maintenance and troubleshooting scans on both the hardware and software components of your computer and ensuring the minimum-security functions are current and monitoring your PC. Windows 10 has many of these maintenance and troubleshooting and security functions available.
